Re: noise investigation docket #8167 5/13 workshop

I felt it important to write to you today after attending the hearing last night. I have lived in Lowell for the past twenty seven years on Irish Hill road just north of the project.

My hope is that you were able to see through the façade that GMP had put together to be sure that supports from Lowell turned out for this meeting. Five from the same family spoke; the Tetreault family is being paid by GMP to lobby for KCW. Ms. St.Onge home burnt and was offered a place on the access road to KCW. Not to forget the gentleman that spoke who works for Vestas; as we tend not to bite the hand who feeds us.

There were also others from First Wind and Georgia Mount who have a vested interest in insuring that the standards not need to be changed. This is where the lack of trust of the process has come from. These large corporations are lobbying hard and the playing field is uneven.

It is clear that there is truly legitimate health issues associated with these projects and that something has to be done.

Thank you for holding this workshop as difficult as it was for us to participate. Now you can see just what it has done to our community.

Sincerely,

Robbin Clark
